

Master Lift Station 5 Force Main Extension Cortez Road West from 119th Street West to 87th Street Court West

NOVEMBER 2023

NOTICE OF CONSTRUCTION

PROJECT INFORMATION

The Manatee County Public Works Department is implementing a wastewater service improvement project to install a 20-inch force main pipe along Cortez Road West. The project is located on Cortez Road West between 119th Street West and 87th Street Court within Manatee County right-of-way. Construction includes extending the 20-inch diameter pipe approximately 10,000 linear feet to connect Master Lift Station No. 5 to Master Lift Station No. 1-M. The new force main will add capacity and relieve excess demand on the existing 24-inch gravity main during periods of heavy rainfall and higher system flows.

NOTICE OF LANE CLOSURE

Beginning mid-November and continuing through January 2024, the outside/southern lane of eastbound SR 684 Cortez Road West, between Valeria Avenue/101st Street West and 87th Street Court West will be closed to accommodate construction activities as part of the Master Lift Station 5 Force Main Extension project. The lane closure will be implemented as construction activities move eastward on Cortez Road West. Eastbound traffic within the impacted area will be directed to the inside/northern travel lane past the closure.

The lane closure will be in effect Monday through Friday, between the hours of 7:00 a.m. and 5:30 p.m. Pedestrian access will be maintained with directional signage and a temporary walkway routing pedestrians south of the construction area. (See Figure 1.1 on the back)

NOTICE OF STREET CLOSURE

To accommodate the lane closure and work being performed as it moves eastward on Cortez Road West, a temporary closure at the intersection of Cortez Road West and an impacted southern side-street may be necessary. In this event, a detour will be put in place to direct travelers to the side-street east of the closure. (For example, Valeria Avenue/101st Street West may be closed with a detour to use 100th Street West, as shown in Figure 1.2 on the back.)

ANTICIPATED COST AND CONSTRUCTION SCHEDULE

-  **Design & Pre-Construction Cost:** \$976,500
-  **Construction Cost:** \$9.6 million
-  **Construction Start:** Spring 2023
-  **Completion Date:** Spring 2024
